Why Jaquar Water Heaters

To ensure that they are worthy of the trust that is placed by customers in every Jaquar product, a whole range of safety, longevity and energy efficiency features have been built in to these water heaters:

1) MORE SAFETY
   • Double Safety Thermostat – dual overheating control mechanism cuts off power automatically even if primary cut off fails
   • Multi-function Safety Valve – discharges water and acts as a non-return valve if pressure or temperature exceed preset limits

2) MORE LIFE
   • Superior Quality Glass-lined Inner Tank – prevents rust, corrosion and prolongs the life of the inner tank
   • Single/Dual Glass-coated Incoloy Heating Elements – made of high quality steel for quicker heating and to prevent scale formation
3) MORE SAVINGS
- High Density Insulation – CFC-free PUF insulation, with added thickness to minimise heat loss and maximise energy savings
- Cathodic Protection – a sacrificial Magnesium Anode protects and saves the tank from electrochemical reactions during water heating

4) ATTRACTIVE DIGITAL FEATURES
